The only valve you'll ever need.

The breakthrough design of the M•PACT Common Valve System makes installation simple. Once an M•PACT valve is installed, you can remodel your bathroom in minutes without the mess of opening up a wall or replacing plumbing fixtures. What's more, you can quickly change your shower fixtures to match your newly installed bath faucet. Fast, easy, fabulous.

Changing your faucet. As easy as changing your mind.

With the M•PACT Common Valve System, you don't have to live with a faucet style forever. You have the freedom and the flexibility to change at your leisure. Just unscrew and replace. You can do it all above the countertop. You don't even have to shut off the water. Of course, Moen fixtures and valves are built to last, but as your needs and style evolve, you have the flexibility to change and refresh your room.

The M•PACT Common Valve System is available for the following applications:

- Widespread bath faucets
- Roman tub faucets
- Tub/shower combinations
- Wallmount bath faucets

To view our M•PACT-compatible faucets, visit moen.com or ask your showroom consultant.
