Moen® Vertical Spa
DESIGN GUIDE
A premium custom shower starts with exceptional design.

**design**  Elevate an ordinary shower into an extraordinary experience with a Moen® vertical spa. Easy to control. Easy to use. And easy to create using this design guide.

**experience**  A Moen vertical spa delivers on your desires. The perfect combination of force, flow, coverage and temperature. All with the freedom to design a shower that is uniquely you—based on your individual preferences.

**innovation**  With the introduction of the ioDIGITAL™ controller, Moen brings the benefits of technology to your bathroom. The innovative ioDIGITAL controller lets you dial in and maintain both temperature and flow with electronic precision. You will no longer have to guess about temperature or constantly adjust handles to stay comfortable. ioDIGITAL puts you in complete control and makes creating a truly personalized shower or bath simple. Once you achieve your preferred combination of temperature and water delivery you can recreate that exact experience any time you desire with the touch of one button.

**customize**  ioDIGITAL offers a level of precision and personalization no traditional shower can match. Best of all, Moen makes this technology simple and easy to use, so you’ll enjoy a better experience even before you step into your next shower. Trim components are built on the revolutionary M•PACT® Common Valve System, so you can change a faucet’s style or finish without having to change the valve. Plus, Moen vertical spa systems coordinate with a wide array of suite styles and accessories.

Let the experience begin.

Determine your showering needs. Use your imagination and this guide to help you design the ideal vertical spa experience. Choose from an array of complete showering spa packages or create your very own.
Select the heart of performance: your Moen valve.

Valves are the “engine” of your vertical spa. They deliver the desired amount of water at the optimal temperature, pressure and flow rate to the shower spray outlets you want to use. Moen offers several spa valve options to suit your needs and desires:

ioDIGITAL

ioDIGITAL is proof that advancements in technology don’t have to be intimidating or overly complicated. With intuitive controls and simple operation, Moen made ioDIGITAL as easy as it is innovative.

Intelligent.

ioDIGITAL will tell you everything you need to know — before you step into your spa. LED lights flash until your requested settings are achieved. There’s even an LED to alert you when the batteries in the optional ioDIGITAL remote control are low. All it takes is a glance. Think of it as love at first sight.

Consistent.

One of the greatest advantages of ioDIGITAL digital technology is the ability to program your preferred settings into memory. With flexibility to store up to four different presets, you can get the exact bath or shower experience you want again and again, with the touch of just one button from the controller or remote control. Nothing could be easier.

Precise.

With each LED on the temperature gauge representing a narrow 3°F range, ioDIGITAL allows you to dial in the precise temperature you desire. Plus, the flow rate system locks in your settings electronically. Even if water is turned on in other parts of your house, you won’t have a noticeable fluctuation in water temperature or delivery.

ExactTemp® 3/4” Thermostatic and volume control valves

ExactTemp allows users to truly customize their showering experience. Day after day, its precise settings let users dial up their own water temperature. That personalized setting maintains temperature for an entire shower. Even when a home’s hot or cold water inlets experience a change in temperature, the ExactTemp “smart” thermostatic technology automatically maintains comfort. There’s no need to keep adjusting the dial throughout a shower or use a different setting in the winter when water pipes might be colder. One setting keeps things constant.
Moentrol® with built-in 3-function transfer valve

The Moentrol valve offers volume control and temperature memory to ensure a consistent, comfortable and safe shower experience. Volume control allows consumers to adjust the amount of water that flows through the shower—from a gentle stream to full force. With temperature memory, Moentrol users can get the same temperature as the previous shower by just pulling the handle forward—no need to fuss with adjustments.

* Must be used with 3372 to obtain vertical spa compatibility.
** ioDIGITAL is warranted for 5 years against leaks, drips and operation defects to the original consumer purchaser; 1-year warranty if used in commercial applications. 5-year warranty on digital components, limited lifetime trim warranty.
Showerheads

Moen showerheads deliver an exceptional cascade of water. And our exclusive Immersion® Rainshower Technology concentrates and magnifies the natural force of your water to dramatically enhance your showering experience.

• One-function showerhead — or —
• Four-function showerhead with massage, full, vigorous and combination spray patterns — or —
• Single-function rainshower — or —
• Multi-function rainshower with "rain" and "rinse" settings

Rainshowers

Personalize the luxury.

An exhilarating experience awaits with Moen showerheads, rainshowers, hand showers, body sprays and tub spouts. Each works from the chosen Moen valve — ioDIGITAL, ExactTemp 3/4" or Moentrol — and is engineered to deliver maximum force at standard flow rates.

Moen showerheads, rainshowers, hand showers and body sprays work together to create complete showering luxury. By understanding the unique water delivery features of each, you can decide what’s best for the desired end experience.

And remember, choosing a Moen vertical spa means you don’t have to sacrifice style. Both ioDIGITAL and the ExactTemp 3/4” valve have a transitional style trim that coordinates with any Moen bath suite. And the 3-function Moentrol valve is available in a variety of trim styles that complement any décor.

We also offer multiple finish options, such as Brushed Nickel, Oil Rubbed Bronze, Antique Bronze or Antique Nickel. For more information, and specific examples, consult our Kitchen & Bath Product Guide [MF1319].
Hand showers
A simple way to transform your shower into an exhilarating spa-like experience. A hand shower adds variety and puts water control right at your fingertips for unlimited freedom.

- Available with slide bar or wall bracket
- Single function model — or —
- Four-function model with massage, full, vigorous and combination spray patterns

Body sprays
Our pivoting body sprays provide maximum coverage. You can place them all on one wall, or spread them over multiple walls and at various heights. Determine where you want water delivery (Top of back? Shoulders? Waist?) when deciding on placement and quantity.

- Pivoting head directs water over a large area.
- Spray pattern designed for constant, forceful delivery.

Tub spouts
Ideal when you want the luxury of a vertical spa, but don’t want to sacrifice an all-in-one shower and tub.

For maximum performance and satisfaction. . .

1. **PSI**
   We recommend at least 40 psi. This will assure adequate water flow and force on all systems, including well or pump. Also, minimizing piping turns and long piping runs will increase performance.

2. **WHEN TO USE MULTIPLE VALVES**
   Each Moen ioDIGITAL and ExactTemp 3/4" valve can accommodate up to four different types of water spray outlets. The Moentrol with built-in 3-function transfer valve can accommodate two spray outlets. A spray outlet counts as one showerhead, one hand shower or multiple body sprays. If your system requires more than one valve, you should plumb each valve from the water supply. Do not tee, or you’ll experience inconsistent water temperature and flow. Also, be sure to recalibrate for hot water tank and drainage needs.

3. **HOT WATER TANK**
   An 80-gallon hot water tank is recommended if your shower layout includes two ioDIGITAL or ExactTemp 3/4" thermostatic valves.

4. **DRAINAGE**
   A Moen ExactTemp 3/4" valve works with plumbing and drainage that is common to most households. Moen ioDIGITAL and ExactTemp 3/4" valves are designed to flow 16 gpm at 45 psi.

5. **GFCI**
   For proper ioDIGITAL use, Moen recommends proper ground fault circuit interrupter (GFCI) use.

NOTE: This information serves as a general guide. For more product information, contact Moen Customer Support at 1-800-BUY-MOEN.
Choose your experience.

Once you understand your options, it’s time to bring the experience to life. The following examples outline some of the most popular configurations. Of course, these are just the beginning of what you can do. Moen spray outlets let you create virtually any experience in any space within a range of budgets.

Enhance your showering experience with the convenience of a hand shower.

For more detailed plumbing information on any of the configurations in this Design Guide, please refer to the Moen Vertical Spa Installation Guide (MF2881).

Design your ideal vertical spa experience.

Maybe you simply want to enhance your shower with the added convenience of a hand shower. Maybe you want to drench yourself in pure showering bliss of top-to-bottom water coverage with multiple showerheads, an additional rainshower, hand shower and several pivoting body sprays. Or perhaps you want the unequaled precision and advanced features of digital technology in your shower.

Whatever you can imagine, you can create. You have the freedom to plan a custom experience from the ground up. Begin now by using the Moen spray outlets and workspace provided on the following pages.

While designing your personal spa, keep in mind that each ioDIGITAL valve, ExactTemp 3/4” Thermostatic valve and Moentrol® valve can accommodate multiple spray outlets. A spray outlet counts as a single showerhead, a single hand shower or multiple body sprays.

Make It Your Own

With a near infinite number of valve and trim style combinations along with a host of showerheads, rainshowers and hand showers that are styled to match the trim you choose, Moen offers you the ultimate flexibility to create just about any shower experience you can imagine. In the look you love. Ask your showroom representative to help you assemble the right products to match your dream.
Design your own experience.

The beauty of a custom shower is just that—it’s customized. Use your imagination and our spray outlets to fill any space with personalized water coverage. While designing your experience, remember that each Moen ioDIGITAL®, ExactTemp® 3/4”, Moentrol® and Posi-Temp® valve can accommodate multiple spray outlets. A component counts as one showerhead, one hand shower or multiple body sprays.
Design your own experience.

Style
Innovative features that are uniquely Moen. Styles unlike anyone else. And dependable faucets that last a lifetime. Clean and classic or bold and contemporary. Whatever look you’re after, Moen offers a variety of styles designed to complement today’s décors.

LifeShine® Finish
Beautiful, durable finishes. That’s what LifeShine delivers—the durability of chrome on a variety of beautiful, decorator-inspired finishes. So, use it every day. Clean it as you wish. You’ll never scrub or wear off the beauty of this finish.

M•PACT®
Install any of our M•PACT-compatible shower trims once, and you can upgrade the style at any point in the decorating or construction process—or switch styles years down the road—without replacing any plumbing.

Certified Savings
Moen proudly offers a number of showerheads that are certified to meet WaterSense® criteria. These fixed, rainshower and hand shower options use up to 30% less water than industry standard to reduce both water usage and utility bills.

Limited Lifetime Warranty
Year after year, that’s the Moen promise. And it’s backed by qualities that make all Moen products durable, reliable and beautiful. All Moen products come with a Limited Lifetime Warranty against leaks, drips and finish defects. Call 1-800-BUY-MOEN for complete details.

ioDIGITAL™ is backed by a Limited Lifetime Warranty against leaks, drips and finish defects to the original consumer purchaser. This warranty is specifically for 5 years if used in residential installations and 1 year if used in commercial installations.

Although descriptions are believed correct at publication approval, accuracy cannot be guaranteed.

Moen reserves the right to make product specification changes from time to time, without notice or obligation, and to change or discontinue models.
